# flu: 5 reasons to have the vaccine

The vaccine will help protect you against flu and serious complications such as bronchitis and pneumonia
- 2. Protect your family and friends**  
Having the vaccine will help protect more vulnerable friends and family
- 3. No injection needed**  
The nasal spray is painless and easy to have
- 4. It's better than having flu**  
The nasal spray helps protect against flu, has been given to millions worldwide and has an excellent safety record
- 5. Avoid lost opportunities**  
If you get flu, you may be unwell for several days and not be able to do the things you enjoy

Most children have the nasal spray vaccine which is the preferred vaccine. A vaccine injection is also available which does not contain gelatine from pigs (porcine gelatin).
